Reflective Disk Display Module

Part Number 622112-006 – 12 Inch

Part Number 622118-006 – 18 Inch

These module assemblies consists of 35 reflective disk elements arranged in a 5 X 7 matrix. Each element can be individually programmed to be set (reflective color side out) or reset (non-reflective side out). The sign module assembly can be one individual module or can be grouped with other modules to form a unique display pattern. This assembly forms the visible display portion of a Variable Message Sign (VMS).

The sign module visibility can be enhanced by fiberoptic , LEDS, or an external light source. Contact Brentwood Display Services Inc. for more information on these enhancement components.

The standard available module sizes are 18" and 12".

FEATURES

- Operating temperature range: -40F to +176F (-40C to 80C)
- Relative humidity: 5 to 95% (non-condensing)
- Low power consumption, current draw only during display change. Long life and high reliability
- Modular construction for low-cost maintenance
- Highly reflective disk material for excellent visibility with most light sources
